

Greetings,

It is with much enthusiasm that I am submitting to you my application for the Job. I worked as a trainee Junior Associate for a law firm in Delhi.

During my recent Freelance journey since May, 2021 I discovered how important Intellectual property is for the small startups and as India is moving towards achieving its 100 unicorn Company, businesses are giving more emphasis on protecting their IP rights in every contract they enter. I found it more intriguing and started studying more about trademark law. As a freelancer I helped startups across the globe in their contract drafting like Loan agreement, Service level agreement, NDA's, Employment agreement, service vendor agreement and in their IP related work like drafting DMCA notices, Trademark mark searches and etc. I have graduated in 2020. After graduating I worked in Bodhi Legal for a year, and my main work was related to Legal research, drafting petition, contract, and various agreements. During my Law School, I have also interned with different Corporate law firms such as Jaypee Associates, VLS & Co. where my main work was to draft legal notices, counter-notice, I also helped seniors in drafting contracts for a different organization, do legal research work and helped in Legal Compliance.

I can thus bring to you "real world" experience in legal research and drafting, client interviewing. My goal of becoming an IP Lawyer will also be supported by my advanced fluency in written and spoken English.

Thank you for your consideration of this application, I have attached my CV with this email. I would be grateful for the chance to meet with you to discuss my qualifications for this position in greater detail.

Respectfully yours,

SHREYANSH GAUTAM
